SKILLS

- HTML
- CSS
- JavaScript
- TypeScript
- Tailwind css
- Bootstrap
- Node js
- Express js
- Mongo db
- Git
- Github
- React js
- React-Redux
- Figma

EXPERIENCE

Junior MERN Stack developer
Level x
2023 - 2024

As a Junior MERN Stack Developer at Level X, I played a key role in crafting dynamic web apps, collaborating on React.js and Node.js projects. Demonstrated adaptability and commitment to code quality, focusing on API development and MongoDB database management.

PROJECTS

MINI PROJECT

FULL-STACK E-COMMERCE PLATFORM

Developed a dynamic web application using Express.js, Node.js, and MongoDB, with an integrated front-end using EJS for dynamic templating. The project consists of both admin and user interfaces to manage and interact with the system.

Technologies Used:
- **Backend**: Node.js and Express.js for server-side development.
- **Database**: MongoDB for efficient data storage and retrieval.
- **Frontend**: EJS for dynamic HTML rendering.
- **Authentication**: Implemented secure user authentication for both admin and user roles.

2020-2023

"REACT REDUX FOOTBALL HUB: NEWS & LIVE TOURNAMENTS"

Developed a robust football platform utilizing React Redux, integrating features such as real-time news updates, live streaming services, and tournament management capabilities. Prioritized user experience and functionality, ensuring seamless navigation and interaction. This project showcases proficiency in frontend development, state management, and API integration, demonstrating the ability to deliver comprehensive solutions tailored to user needs.

SKILLS ACQUIRED:

- Proficiency in React and Redux for frontend development
- Advanced understanding of JavaScript, HTML5, and CSS3
- Experience in integrating and managing RESTful APIs
- User interface design and development
- State management and data flow optimization
- Troubleshooting and debugging in a React Redux environment
- Collaboration and teamwork in a project-based setting
